

GUIDE TO USING: Tropical Shade Lake and Pond Dye is concentrated and long lasting. One gallon will create a beautiful deep blue look in a one acre pond to a depth of four feet (1,300,000 gallons of water). Actual coverage may vary based on water quality.

Apply directly to water from bottle, usually from the shore or slow moving boat. The wind and water current will mix the dye throughout the entire water body.

It is important to note that floating leafed plants such as lilies are not affected if they have already surfaced. Should product contact the leaves directly some discoloration may occur on the end of the plant leaves.

Tropical Shade is not harmful to fish, turf, birds and other ecosystem wildlife when used at the rate of one gallon per four acre feet of water.

RECOMMENDED USAGE RATES	DECORATIVE		LAKES AND PONDS	
	LIGHT	DARK	SHADE (1 PPM)	BLOCK (2 PPM)
1 OZ.	20,000 GALLONS	10,000 GALLONS	—	—
